

Introduction

Pre-Application Webinar for RFA-OD-12-007 (P30)

February 8, 2013

David M. Murray, Ph.D.

Associate Director for Prevention

Director, Office of Disease Prevention

National Institutes of Health
Office of Disease Prevention

Tobacco Regulatory Science Program

- Developed as a partnership between FDA and NIH
- Office of Disease Prevention has NIH oversight responsibility
- With input from FDA, NIH staff prepare funding opportunity announcements, screen applications for responsiveness to FDA's regulatory authority, arrange for scientific review, manage projects once funded, and communicate with extramural investigators
- TRSP represents an addition to the NIH tobacco research program and does not replace or diminish any existing tobacco research activities at any of the Institutes or Centers.
- More information available at:

Office of Disease Prevention

The Mission of the Office of Disease Prevention

- Work with NIH Institutes and Centers and other partners to provide leadership for the development, coordination, and implementation of activities to increase the scope, support, public health impact, and dissemination of health promotion and disease prevention research supported by the NIH.

Tobacco Regulatory Science Program (TRSP)

Located in the NIH Office of Disease Prevention (ODP), the Tobacco Regulatory Science Program (TRSP) coordinates the trans-NIH collaborative effort with the Food and Drug Administration's (FDA) Center for Tobacco Products (CTP) to conduct research to support its regulatory activities over tobacco products.

With the passage of the [2009 Family Smoking Prevention and Tobacco Control Act](#) (Tobacco Control Act), the FDA acquired the authority to regulate the manufacture, marketing, and distribution of tobacco products in order to protect public health. Within the framework of the Tobacco Control Act, the NIH and FDA formed an interagency partnership to foster tobacco regulatory research. The NIH has the infrastructure for the solicitation, review, and management of research, and several NIH Institutes and Centers have long supported tobacco-related research as part of their missions. The FDA has expertise in tobacco regulatory science and the authority and resources to support research responsive to FDA's regulatory authority. NIH biomedical, behavioral and social sciences research supported via funding from FDA will provide the scientific evidence needed to better inform FDA's regulatory authorities.

Funding Opportunities

Current Funding Opportunity Announcements

In collaboration with the FDA Center for Tobacco Products, NIH is increasing its portfolio to support the scientific needs of the Center. Below you will find a listing of funding opportunities that are currently accepting applications.

| Title | Announcement # | Receipt Date |
|--|--|---|
| NIH Revision Applications for Research Relevant to the Family Smoking Prevention and Tobacco Control Act (P30) Frequently Asked Questions (PDF, updated 1/17/13) Pre-Application Webinar | RFA-OD-12-007 | March 26, 2013 |
| Tobacco Control Regulatory Research Frequently Asked Questions (PDF, updated 12/21/12) | PAR-12-267 (R01) PAR-12-268 (R03) PAR-12-266 (R21) | June 18, 2013 January 15, 2014 June 17, 2014 January, 16, 2015 |

Investigator initiated applications may also be submitted for review. Refer to the [Research Priorities](#) page for topics relevant to FDA. Interested applicants should work with their NIH Program Officials or send a question to [Contact Us](#).
